

SimCorp Dimension® End to End Migration Service

Service Overview

As the markets leading independent SimCorp Dimension® consultancy, managing migrations has been a core part of our business for a number of years and is built on a strong team of highly skilled industry professionals with detailed knowledge of SimCorp Dimension. We have worked with data migration driven by green field implementations of SimCorp Dimension, mergers as well as consolidation of internal applications. We have developed a model that manages data migrations from start to finish and can be tailored to meet the specific needs of the clients business. We understand the wide ranging impact across the organisation of a major systems migration and recognise the project must be business driven, while considering the SimCorp Dimension configuration, core businesses processes, data structure and the data available from the legacy applications.

Axxsys™ Approach

We provide a flexible engagement model that is tailored to the needs of the business. It can be deployed for the whole project or at any point in the migration process. We are driven by the firms strategic objectives and our goal is to ensure the business **achieves the expected benefits** from the project.

Determining the scope of the project is key to delivering a successful migration, this includes:

- Definition of scope and strategy for System Migration as a whole
- Definition of scope and approach for Data Migration specifically
- Assignment of business and technical resources
- Hardware setup and software installation
- Configuration of SimCorp Dimension
- Creation of reference and static datasets specific to the client
- Compliance with Internal and External Audit documentation requirements
- Detailed Go-Live Plan with full Runbook for the new platform

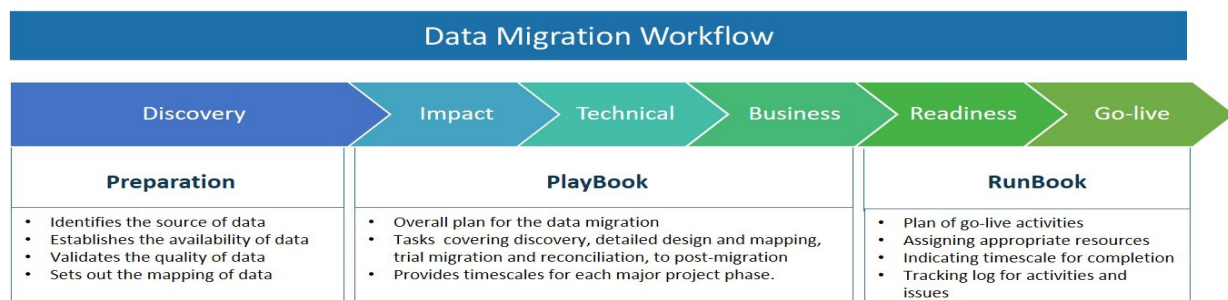

Our service is based on the **Axxsys Axxelerator methodology**. Our SimCorp Dimension Migration Axxelerator incorporates a detailed workflow and comprehensive range of activities that manage the migration from start to finish.

There are three distinct phases of the data migration workflow:

Discovery: A Toolset provides a high-level framework which can be easily customised to address the needs of the client.

Playbook: Overall plan for the data migration process, outlining all project tasks and providing indicative timescales for each.

Runbook: Detailed plan of the go-live activities, records progress as the migration moves towards becoming business ready.

Why Partner With Axxsys Consulting?

Some of the worlds leading asset managers and largest SimCorp Dimension clients have partnered with Axxsys for large scale migrations due to our **strong reputation and extensive experience in the market** which is based on our:
